

# 2026

## JOINT ASN-NSS PERI-OPERATIVE CONFERENCE

The power of Inter Professional  
collaboration - enhancing  
peri-operative practice.

Pre conference  
workshops start from 03 August

**VENUE**  
**WINDHOEK**

# WELCOME & INVITATION TO PARTNER

The Anaesthesiology Society of Namibia (ASN), together with the Namibia Surgical Society (NSS), is pleased to invite your organisation to partner with us for the First Joint ASN–NSS Peri-operative Conference, to be held on 06 – 08 August 2026 in Windhoek. Pre-conference workshops will start the Monday 03 August 2026 and run throughout the week.

---

This inaugural joint conference marks a significant milestone in Namibia's healthcare landscape. For the first time, anaesthesiology, surgery, critical care, nursing, and allied peri-operative professions will come together on a single national platform to strengthen collaboration and shared responsibility in peri-operative care.

## **The theme of the 2026 Conference is:**

*“The Power of Inter professional Collaboration – Enhancing Peri-operative Practice.”*

This theme reflects the central role of teamwork, communication, and mutual respect in achieving safe, effective, and high-quality surgical outcomes. It recognises that excellence in peri-operative care is driven not only by technical expertise, but by strong interdisciplinary collaboration across the peri-operative pathway.

***With an anticipated attendance of 300–350 delegates*** from across Namibia and the region, the Joint ASN–NSS Conference is expected to be the largest and most specialised peri-operative scientific meeting held in the country to date. Delegates will include specialists, registrars, medical officers, nurses, theatre staff, and allied health professionals working across peri-operative and surgical services.

Industry partners play a vital role in advancing healthcare education and innovation. In addition to the structured sponsorship packages outlined in this prospectus, the Conference Executive welcomes engagement on tailor-made sponsorship arrangements, recognising that organisations have differing strategic priorities and product portfolios.

The Conference week will include ***multiple hands-on workshops*** in addition to the main scientific programme. Depending on product relevance, partners may have opportunities for presence at workshops and the main conference, exhibition stands at multiple venues, and structured product demonstrations or educational engagement, subject to scientific oversight.

---

In general, a ***minimum commitment at the level of a Prime Exhibition Stand*** provides the foundation for more flexible advertising opportunities, enhanced presence, and allocated engagement time during workshops or scientific sessions. Where appropriate, partners may also be approached to support workshops through the provision of equipment, consumables, or machines required for high-quality skills-based training.

We invite you to review the sponsorship opportunities outlined below and to engage with us in shaping a partnership that supports both your organisational objectives and the advancement of peri-operative practice in Namibia.

# SPONSORSHIP OPPORTUNITIES
